

Coordinators:

Welcome back to a new school year. Hope everyone had a great summer. Even though you are returning for the 13-14 school year, we are still working on 12-13 data in TEDS. Career Readiness data has been sent to the Office of Assessment and Accountability (OAA) to combine with college ready data, so that they can load the first round of 12-13 CCR data to their SDRR system. DACs in your district will have access to this data after it has been posted. I would suggest working with your DAC to ensure that all career readiness data is correct. Please remember that any career readiness data that is not correct will need to be cleaned up in TEDS.

Timelines

August 14th – College and Career Readiness data was posted in the OAA SDRR system for DACs to review

October 1st – All 12-13 TEDS Data will lock

Early October – TEDS will rollover to 13-14 for Fall Data Entry

November 1st – CTC First Semester/Trimester Data Due in TEDS

November 15th – All non-ATC/CTC schools First Semester/Trimester Data Due in TEDS

Hot Topics

College and Career Readiness Data Has Been Released

The Office of Assessment and Accountability (OAA) sent out a Special DAC email yesterday to their contacts letting them know that the SDRR system has been opened for data review. This means that CCR data is now available to DACs at the student level. Your DACs will most likely be looking to you to help verify the career ready side of the data. Please remember that all changes to Career Ready data must be made in TEDS even though the data is being reviewed in SDRR.

ASVAB CDs

Please note that ASVAB CDs are no longer being sent out to schools. The reports were sent out in May to schools. Please maintain these reports or other official reports at the district/school for evidence for monitoring visits.

School Report Card (SRC)

This year the school report card will include Career Pathway and Industry Certification data. This data is located on the Learning Environment tab in the SRC. Please see attached email that was sent out to districts. CTE staff does not need to complete the steps in the email, but we would like you to look at the format of the new career pathway screen. Also, ATC and CTC student enrollment data has been added to the SRC based on student enrollment data in TEDS. This would not include enrollments for non-CTE courses in those schools. Please note that the current pathway data included in the SRC includes active and inactive enrollments, but final data will only include active enrollments for the 12-13 year.

KOSSA Data Uploaded to TEDS and to KOSSA System

I have sent out several messages recently to contacts letting them know that we have uploaded KOSSA to TEDS and also import results for KOSSA to the KOSSA system. Please check your data to ensure that all KOSSA was uploaded correctly.

CIP Code/Career Pathway Changes

Attached is the email I sent out about pathway changes. Ensure that if you were using one of the career pathways or CIP Codes that have been removed, that you send a request to add a new replacement. Also, one addition to this list is the Computer Aided Drafting previously had two different CIP Codes, but now, the only valid CIP Code for 13-14 for CADD is 15.1301. If you were using a different CIP Code, please complete the career pathways change form in the email.

[TEDS Beginning of Year Trainings](#)

There are five scheduled trainings for new TEDS data entry staff. These trainings are scheduled for August 21 and September 4, 16, 20, and 25. These are one day - full day trainings and are first come first served. Each training is from 8 AM-4:30 PM EST. Please click the link above to go to the registration system to sign up. These trainings are designed for staff that will be entering the data for TEDS only.

TEDS Outage Issues

We are aware of the issues that users are experiencing with TEDS outages and with reports not functioning correctly. We apologize for the inconveniences, but have experienced some after effects of moving TEDS to virtual up-to-date servers. Our database analysts, server support, and programmers are working on the issues and hope to remedy them soon. If you experience troubles with TEDS, please send an email to me with the exact problem that you are having and the process that you are trying to complete. This will help us track down these issues and fix these problems. Thank you.
